

Review of CCC Site Open Git Issues

In progress or completed issues:

- Add comment section to posts page (#2)
 - Task begun, there is a field on post pages to take comments, but it does not yet display them. Mockup that shows what comments should look like on the page:

- Help/Tutorial Page GIF (#15)
 - There exists a tutorial video on the FAQ page, but it demonstrates how to make a post. (I believe that this is actually making a forum, since it is adding a new pin to the map) Is the tutorial supposed to show how to use filters and pin descriptions for those creating the pin, or users navigating the site?
 - Recreate video when the site is closer to complete so that it correctly represents how to navigate the finished site.
- Admin Page - "Current Users" (#21)
 - There exists a "Users" section on the Admin page that lists current users. (This should list active and pending users according to the filter at the bottom)

- Admin Page - "Current Users" #2 (#22)
 - There exists an operational search bar on the "Users" page.

- Admin Page - "Current Users" #3 (#23)
 - If one clicks on a user from the list on the "Users" page, there is a "Delete" button at the bottom of their page.
- Admin Page - "Current Users" #4 (#24)
 - There is no "Edit" button, but if you click on a user from the list on the "Users" page, you may edit their name, email, and other information, though there is no field from their phone number as listed in the Git issue.
- User Upload Page - Issues (#27), User Upload Submission - Sub Issue #3 (#29), User Upload Submission - Sub Issue #4 (#30), and User Upload Submission - Sub Issue #5 (#31)
 - If this refers to users uploading a Forum, then after signing in, a user can go to their account page and create a Forum by clicking the "Create Forum" button.
 - This allows the user to fill in the Title (#27), Location (#29), and Content (#30) fields. It also requires them to select a tag, state whether they are associated with the group providing the solution, state whether the forum should be public or private, and upload up to 4 files (#31). There is also a Submit button at the bottom of the page.
 - User Upload Submission - Sub Issue #2 #28 states that the submission form shall require the user to enter a first and last name for the uploader. (added these fields but they need to be styled to match the other fields.
- Map Functionality (#33)
 - On the Map page, there exists a way for the user to filter pins on the map based on tags.
- Contributor Features (#35)
 - On the upper right side of the site, there is a "Sign In" button (not "Contributor Login" as stated in the Git issue) that allows the user to enter their username and password to login to their account.
- Contributor Features - Sub Issue #2 (#36)
 - On the upper right side of the site, there exists a "Sign Up" button (not "Contributor Sign up" as stated in the Git issue) that allows the user to enter a Username, Email, Password, and Confirm Password.
 - No field to enter "a description of what it means to be a contributor" as stated in Git issue
- Contributor Features - Sub Issue #3 (#37), Contributor Features - Sub Issue #4 (#38), and Contributor Features - Sub Issue #5 (#39)
 - By clicking on the User's personal page after signing in, one can click on the "Search Contributors" button. This brings up the following page that allows one to search for contributors using a search bar (#38), and sort the resulting list alphabetically or by number of forums. The search function does not search using

the beginning letter of the contributor's name (as stated in the Git issue), but rather for any letter in the name.

- **Note:** Git issue #37 is not completed as there is no “Alphabet Display” button on this page to alphabetically navigate through a list of all contributors, though there is a way to filter through search results alphabetically.

The screenshot shows a sidebar on the left with five buttons: 'Search Contributors' (orange), 'Create Forum' (yellow with a plus icon), 'My Forums' (yellow), 'My Account' (yellow with a user icon), and 'Sign Out' (yellow with a door icon). To the right of the sidebar is a search section titled 'Chesapeake Community Connect'. It contains a search input field with 'Roman' entered, a 'Sort By' dropdown menu set to 'A-Z', a yellow 'Submit' button, and a link that says 'Roman 2 Forums'.

- This search is for all forums across the site, not for a particular page so clarification is necessary for what the Git issue covers
- **Note:** After search, the list of contributors' names are displayed, but the mission statements are not yet being displayed. (#39)
- Contributor Features - Sub Issue #7 (#41)
 - Using the Create Forum button on a User's page after logging in allows them to “be able to share information on the website that will aid in providing knowledge on environmental issues and concerns and other updates. Submission requirements would include the location, resource links, and written words that describe the message the user wants to share.” as outlined in the Git issue.
- Git issues #35 - #41 are the exact same as issues #42 - #48
 - Delete issues #42 - #48 since they are redundant.
- Website Menu Taskbar (#51)
 - There exists a taskbar at the top of the website that includes the pages: Map, About Us, Help/FAQs, Contributors.
 - **Note:** This differs from the page name requirements stated in the Git issue: Home, About, Contributors, Help/Tutorial
- Contact Us Page (#53) and Contact Us Page: Sub Issue #2 (#54)
 - On the Help/FAQ page, there is a Contact us button (Not a page as stated in the Git issue) that allows users to enter their Name (#24), Email Address (#54), Subject, and Message.

- Help/Tutorial Page GIF (#15) and Help/Tutorial Page Display (#58)
 - These Git issues are redundant and #15 can be deleted as it does not have the sub issues included with #58
 - There exists a tutorial video on the FAQ page, but it demonstrates how to make a post. (I believe that this is actually making a forum, since it is adding a new pin to the map) Is the tutorial supposed to show how to use filters and pin descriptions for those creating the pin, or users navigating the site?
 - Recreate video when the site is closer to complete so that it correctly represents how to navigate the finished site.
- Help/Tutorial Page Display: Sub Issue #2 #59
 - There exists an FAQ section on the Help/FAQs page (not Help/Tutorial as stated in Git issue) that lists FAQs in drop downs
 - Are the 3 questions already listed all that the customer requires or do we need to add more? If those already listed are all required, the task may be closed.
